COVID-19 test lane of Graz University of Technology

Guideline and recommendations for its use

As of Monday, November 8th, the Covid-19 test lane at Graz University of Technology will only be open to the following groups of people - on presentation of the relevant proofs -

- fully vaccinated persons
- recovered and additionally vaccinated persons

Employees and students of Graz University of Technology as well as employees of companies located on the campus of Graz University of Technology who belong to the above-mentioned groups of people can register once a week for a free antigen test. Depending on the dynamics of the infection situation, the more precise PCR tests may be used instead of the antigen tests.

- People who cannot be vaccinated for medical reasons and can prove this with a doctor's certificate can be tested by PCR test every Mon, Wed and Fri.

The opening hours of the test lane are:

Mon, Wed 08:00 to 10:00 a.m.
Fri 11:30 to 13:30

How do I register for a test?

You can register for a test at https://coronatest.tugraz.at.

You can register for the desired date at any time, but you must do so no later than two hours before the test lane opens on the desired test day.

Do I get a test certificate or a test attestation?

Test certificates for a negative PCR test will be issued for all persons by the evaluating laboratory (Hygienicum) and sent to the email address given during registration.

If the test is positive, the person concerned will be notified directly by the laboratory by phone/email.

Test certificates for a negative antigen test will no longer be issued.

When can/should I be tested?

The following examples are for orientation and do not imply an absolute obligation to test. Since even vaccinated or recovered persons can become infected with Covid-19, albeit to a very limited extent, and thus become carriers, we recommend voluntary and free testing in the following cases:

before and especially AFTER business trips (especially to Covid-19 risk areas)
before, after and during face-to-face teaching events such as seminars, laboratory exercises, tutorials or examinations where there is particularly close and prolonged contact
during repetitive activities with direct "customer contact".
when Covid-19 cases occur in a private environment, unless the authorities take action within 48h!

Recommended timing of the test:
In order to obtain a valid and, as far as possible, reliable result, we would like to point out that it makes sense, e.g. after business trips or contact with a Covid19 positive person, to wait for a latency period of at least 3 days and then have the test carried out.

If typical Covid-19 symptoms occur (e.g. loss of sense of smell or taste), the test route must not be visited. In these cases, 1450 must be contacted.

For persons with ambiguous Covid-19 symptoms (e.g. symptoms of a cold), a special time slot is available on Mondays and Wednesdays from 09:45 to 10:00 and on Fridays from 13:15 to 13:30. In this case, please register for the test during the above-mentioned time slot, but please wait in front of the main entrance of the chemistry building at Stremayrgasse 9 until you are invited in for the test. The Covid-19 test line staff has the right to refuse the test and refer you to 1450.
